CERAMIC GLASS 9D

Ceramic glass is the best combination of foil and glass features.

The 9D technology, perfectly suited to the selected phone model, protects the phone on its entire surface, including the rounded edges of the display.

The 0.33mm thick glass ensures high transparency and touch sensitivity.

Equipped with a shatterproof layer, thanks to which the glass does not break.

The glass has an adhesive on the entire surface, thanks to which it perfectly adheres to the screen and does not leave air bubbles.

It is covered with a special oleophobic coating, that make it fingerprint resistant and easy to clean.

SPECIFICATION

Purpose: screen protection

Technology: 9D

Thickness: 0.33mm
