

SZKŁO HARTOWANE SPIGEN GLASS FC IPHONE 13 / 13 PRO / 14 / 16E BLACK

Product code: 8809811851298-AGL03392

EAN: 8809811851298

Crystal clear tempered glass with the widest possible die dedicated to cases. Glass FC perfectly reproduces displayed colors and does not affect touch sensitivity. It is made from recycled and reinforced tempered glass with a thickness of 0.3 mm. It has a surface hardness (resistance level) of 9H, making it extremely resistant to scratches even when in contact with sharp objects (knife, keys). Additionally, it is coated with a special nano layer that protects the screen from leaving fingerprints or other contaminants. Glass FC excellently protects the valuable screen during extreme falls. Installation is extremely easy and accessible to every user.

* The glass has the widest possible Case Friendly die, meaning it will be compatible with most cases on the market and with any case from Spigen.

** Due to the various edge milling of displays, after installing the protective film/glass on the screen, a slight air halo may form around the screen. This is a natural situation and depends on the screen itself.

INSTALLATION INSTRUCTIONS:

- 1) Start the installation in the bathroom right after a shower - the steam will absorb all the dust from the atmosphere and it won't interfere with your installation.
- 2) Thoroughly clean and degrease the screen surface, then polish it to a shine with a dry cloth.
- 3) Install the coating as evenly as you can - you can position it using two strips of tape, sticking them to the side of the device.
- 4) Eliminate air bubbles by pressing down firmly in circular motions for several dozen seconds. Do this so that the adhesive layer bonds with the screen as strongly as possible.
