Protective case with a revolutionary and innovative design!

It is made of a combination of scratch-resistant tempered glass (hardness level 9H) and flexible TPU that absorbs impacts.

Thanks to this construction, the case comprehensively protects the phone from scratches and drops during everyday use. The back panel of the case is exceptionally scratch-resistant, and since it is made of glass, it is fully transparent and perfectly showcases the phone's design.

The panel is coated with an oleophobic layer that reduces the amount of fingerprints left behind.

Quartz has undergone drop tests, falling 26 times from a height of up to 1.2m, thus receiving the American military certification MIL-STD 810G-516.6.
