

SZKŁO HARTOWANE SPIGEN GLAS.TR "EZ FIT" FC IPHONE 15 PRO MAX BLACK

Product code: 8809896752039-AGL06879

EAN: 8809896752039

The tempered glass with a revolutionary installation method - if you have been intimidated by this aspect of using tempered glass, your problems have just been solved!

The tempered glass from the "EZ Fit" series by **Spigen** has been secured with a perfectly cut mounting frame for the front of the phone, allowing you to position it perfectly on the screen. The manufacturer has simplified the installation process to the point that it is fully intuitive for every user.

Glas.TR EZ Fit is a product perfectly fitted to the display of your device.

Full Cover, also known as Case Friendly, means that the glass is cut in such a way that it will not be snagged by the case, preventing accidental peeling of the glass.

The tempered glass with a thickness of 0.3mm has a surface hardness of 9H, which is nearly the maximum resistance to scratches that can be achieved.

An additional oleophobic coating prevents excessive fingerprints or other contaminants, as well as protects against additional scratches.

The minimalist design with precise cutouts and crystal clarity provides an amazing immersion with the device, making it easy to forget that we have glass on it, which gives us additional protection.

See how easy it is: https://www.youtube.com/watch?v=SqhPSAi-Vjg&ab_channel=FlavourDesign%7CAutoryzowanysklepSpigen

* The glass has the widest possible Case Friendly cutout, meaning it will be compatible with most cases on the market and with every case from Spigen.

** Due to the various edge milling of displays, after installing the protective film/glass on the screen, a slight air halo may form around the screen. This is a natural situation and depends on the screen itself.

INSTALLATION INSTRUCTIONS:

- 1) Start the installation in the bathroom right after a shower - the steam will absorb all the dust from the atmosphere and it will not interfere with your installation.
- 2) Clean and degrease the screen surface thoroughly, then polish it to a shine with a dry cloth.
- 3) Place the frame with the unsealed glass on the front of the phone.

4) Remove the frame along with the protective film. Get rid of air bubbles by pressing the entire surface in circular motions for several seconds. Do this so that the adhesive layer bonds with the screen as strongly as possible.

PRODUCT FEATURES:

- 100% Original
- Packed in original packaging
- Exceptional ease of installation thanks to the mounting frame
- Hardness 9H
- 2.5D milled edges that feel nice to the touch
- Additional oleophobic layer
- Perfect clarity
- Does not affect touch functionality
