TEMPERED GLASS 5D BP

High-quality 5D tempered glass protects the phone screen against damage.

Modern 5D technology, perfectly suited to the selected phone model, protects the phone on its entire surface, including the rounded edges of the display.

The glass is only 0.33 mm thick, which makes it highly transparent and sensitive to touch.

It conducts perfectly and does not hinder the use of the touch screen.

The glass has an adhesive on the entire surface, thanks to which it perfectly adheres to the screen and does not leave air bubbles.

It is covered with a special nano coating that protects the screen against fingerprints and dirt.

SPECIFICATION

Purpose: screen protection

Technology: 5D

Thickness: 0.33mm
