

KLATKA FARADAYA TECH-PROTECT KLR100 POUCH KEYLESS RFID SIGNAL BLOCKER CASE BLACK/BLACK

Product code: 5906302330966

EAN: 5906302330966

The Tech-Protect KLR100 RFID pouch is an advanced accessory that effectively protects car keys from unauthorized access and theft using keyless technology. Made from high-quality materials, it not only provides an elegant appearance but also exceptional durability and water resistance, ensuring long-lasting use in any conditions.

The pouch features a sturdy, easy-to-use Velcro closure that guarantees secure fastening, keeping your keys safe and protected from accidental drops. The functional keychain allows for easy removal of keys from the pouch, enhancing everyday usability.

Inside, there is a double protective layer made of RF material that effectively blocks RFID, EMF, Bluetooth, Wi-Fi, GPS, and other radio waves, providing complete protection for your keys against attempts to remotely copy or read them. This way, even near potential threats, you can be confident that your car remains secure.

An additional advantage of the pouch is the practical metal clip, which allows for easy attachment to a belt, bag, or backpack, increasing its mobility and comfort of carrying. Every element of the pouch, from the sturdy closure to the durable finish, has been designed for long-lasting and reliable use.

The Tech-Protect KLR100 is the ideal solution for those who value the security of their vehicles and high standards in protective accessories.
