## TECH-PROTECT DIGITAL MAGNETIC STYLUS PEN IPAD WHITE

Product code: 0795787711408

EAN: 0795787711408

Tech-Protect Digital Stylus is an advanced graphic tool that allows for precise graphics and drawings on the Apple iPad tablet. The small tip and high touch sensitivity guarantee accuracy during drawing and graphic processing. The accessory has an ergonomic shape that minimizes hand fatigue and improves comfort during use. Inside the stylus, there is a small magnet similar to the one found in the Apple Pencil. With it, we can conveniently attach the stylus to the side edge of the iPad Pro.

Using the device is simple and intuitive. The stylus is turned on by gently touching its tip. The accessory will automatically turn off to save energy after 20 minutes of inactivity.

The built-in LED indicates the status of the device's usage. The blue color indicates that the stylus is on, while the red color appears during low battery and charging. The LED turns off when the device is fully charged, indicating that it is ready for use again.

The Tech-Protect stylus is a multifunctional tool that is suitable for everyday use as well as for creating precise graphics and drawings on the Apple iPad tablet.
