SZKŁO HARTOWANE SPIGEN GLAS.TR SLIM IPHONE 13 13 PRO 14 16E 17E CLEAR

Product code: 8809811851281-AGL03391

EAN: 8809811851281

Crystal clear tempered glass that perfectly reproduces displayed colors and does not affect touch sensitivity. Made from recycled and reinforced tempered glass with a thickness of 0.2mm. It has a surface hardness (resistance level) of 9H, making it extremely resistant to scratches even when in contact with sharp objects (knife, keys). Additionally, it is coated with a special nano layer that protects the screen from leaving fingerprints or other contaminants. Glas.TR perfectly protects the valuable screen during extreme falls. Installation is extremely easy and accessible to every user.

* The glass/film is cut only for the flat part of the display with a raised structure, according to and based on the die prepared by the manufacturer of the specific phone model. Only such cutting of the film/glass will ensure complete compatibility with our protective accessories.

** Due to the various edge milling of displays, a delicate air halo may form around the screen after installing the protective film/glass on the screen. This is a natural situation and depends on the screen itself.

INSTALLATION INSTRUCTIONS:

- 1) Start the installation in the bathroom right after a shower - the steam will absorb all the dust from the atmosphere and it won't interfere with your installation.
- 2) Clean and degrease the screen surface thoroughly, then polish it to a shine with a dry cloth.
- 3) Install the coating as evenly as you can - you can position it using two strips of tape, sticking them to the side of the device.
- 4) Get rid of air bubbles by pressing everything down in circular motions for several dozen seconds. Do this so that the adhesive layer bonds with the screen as strongly as possible.
