SZKŁO HARTOWANE SPIGEN GLASS FC IPHONE 13 13 PRO 14 16E 17E BLACK

Product code: 8809811851298-AGL03392

EAN: 8809811851298

Crystal clear tempered glass with the widest possible cutout dedicated to cases. The Glass FC perfectly reproduces displayed colors and does not affect touch sensitivity. It is made of recycled and reinforced tempered glass with a thickness of 0.3 mm. It has a surface hardness (resistance level) of 9H, making it extremely resistant to scratches even when in contact with sharp objects (knife, keys). Additionally, it is coated with a special nano layer that protects the screen from fingerprints or other contaminants. The Glass FC perfectly protects the valuable screen during extreme falls. Installation is extremely easy and accessible to every user.

* The glass has the widest possible Case Friendly cutout, which means it will be compatible with most cases on the market and with every case from Spigen.

** Due to the various edge milling of the displays, after installing the protective film/glass on the screen, a delicate air halo may form around the screen. This is a natural situation and depends on the screen itself.

INSTALLATION INSTRUCTIONS:

- 1) Start the installation in the bathroom right after a shower - the steam will absorb all the dust from the atmosphere and it will not interfere with your installation.
- 2) Clean and degrease the screen surface thoroughly, then polish it to a shine with a dry cloth.
- 3) Install the coating as evenly as possible - you can position it using two strips of tape, sticking them to the side of the device.
- 4) Remove air bubbles by pressing the entire surface with circular motions for several seconds. Do this so that the adhesive layer bonds with the screen as strongly as possible.
