TECH-PROTECT Q15W-S2 WIRELESS CHARGER 15W BLACK

Product code: 9490713929865

EAN: 9490713929865

S2 is the continuation of the reliable series of wireless chargers from Tech-Protect. This accessory combines a convenient stand with the ability to quickly and safely recharge your smartphone. The built-in coil allows for charging in both vertical and horizontal positions.

Made from high-quality PC and ABS components. Durable and elegant, with a minimalist, compact design - the matte finish prevents fingerprints and highlights the subtle silhouette. Both the bottom and the base are covered with non-slip material, ensuring that the charger stays securely in place and the phone does not slip off.

The protective system safeguards connected devices against overheating and overvoltage, maintaining a consistently low temperature during charging. Therefore, leaving devices on the charger for several hours is completely safe.

* To utilize the full capabilities of the wireless charger, we recommend connecting it to a wall charger with an output power of 20W (V*A) or more.
