## TECH-PROTECT V0-HUB ADAPTER 5IN1 GREY

Product code: 9490713935255

EAN: 9490713935255

The multifunctional Tech-Protect V0-HUB 5in1 device is a compact adapter that provides the ability to charge and synchronize data. It is suitable for all computers that support USB-A ports. The splitter is made of aluminum, which guarantees its durability and resistance to damage.

The device is equipped with five ports that enable various functions. Three USB-A 2.0 ports allow data transfer speeds of up to 480 Mbps (i.e., 60 MB/s). This allows for quick and efficient file transfers between devices.

One USB-A 3.0 port offers a transmission speed of 5 Gbps (640 MB/s). This means that larger amounts of files can be transferred in an even shorter time. This is particularly useful when transferring videos or large graphics.

Additionally, the adapter has one USB-C PD (Power Delivery) port with a power of 5V2A, which allows for quick energy renewal in your accessory.

Thanks to its multifunctionality and efficiency, the V0-HUB is an excellent solution for those who need a flexible and versatile device for charging and data synchronization.

\* The USB-C socket is only used as a by-pass for charging the device to which the HUB is connected (laptop, smartphone). It does not support data transmission.

### **PRODUCT FEATURES:**

- 100% Original
- Packed in original packaging
- Made of aluminum
- Adapter length: 10.1cm
- Cable length: 13.5cm
- 1 x USB 3.0 Port
- 3 x USB 2.0 Ports
- 1 x USB-C Port

**SET INCLUDES:**

1 x Tech-Protect V0-HUB Adapter
