TECH-PROTECT MMR300 MAGNETIC MAGSAFE PHONE RING SILVER

Product code: 5906302308798

EAN: 5906302308798

Tech-Protect MMR300 is a revolutionary finger holder that combines advanced MagSafe technology with convenience and functionality. Made from durable aluminum alloy, this easy-to-use ring mounts on the back of the phone to a compatible MagSafe case or directly on the smartphone.

Its flat design not only provides protection for the device but also allows for comfortable use. The finger holder can also serve as a stable base for watching movies or photos, significantly increasing usability during entertainment.

The third, equally important feature is the magnetism of the holder. This allows it to be used as a connection between the phone and the MagSafe magnetic mount, enabling secure mounting of the device, for example, in the car, without the need to hold it in your hand.

Mounting the holder is extremely simple and leaves no marks after removal, allowing for hassle-free use of wireless charging. The Tech-Protect MMR300 MagSafe Phone Ring is an excellent solution for those looking for a convenient and multifunctional way to use their phone.
