ESR CLASSIC HYBRID KICKSTAND HALOLOCK MAGSAFE & TEMPERED GLASS IPHONE 16 PLUS CLEARBLACK

Product code: 4894240243688

EAN: 4894240243688

The Classic Hybrid Kickstand HaloLock MagSafe case provides a high level of protection and beautifully highlights the original look of your smartphone. The case is a combination of rigid and hard backs made of PC and acrylic, along with a soft TPU frame reinforced at the corners.

In addition to the standard raised protection around the lenses, the case is additionally equipped with a metal, opening frame that can easily be transformed into a functional stand. It has button covers and cutouts for ports.

The HaloLock is equipped with a ring compatible with the wireless MagSafe technology. The magnetic ring ensures maximum charging efficiency and a quick and easy connection with all MagSafe-compatible accessories.

Additionally, the manufacturer has included high-quality tempered glass in the set. This is an ideal way to protect the screen from scratches and impacts. It has a thickness of 0.3mm and a hardness of 9H, which is sufficient to effectively protect the display, while the glass itself has high resistance to superficial scratches. It is also coated with an oleophobic layer that reduces the degree of fingerprint marks.

The included installation accessories along with the positioning frame make installation very easy and accessible to literally everyone. The frame allows for perfect positioning of the cover with the screen, and the other accessories serve to mount without bubbles and dirt - installing this type of product on such a large screen surface has never been simpler!

INSTALLATION INSTRUCTIONS:

- 1) Start the installation in the bathroom right after a bath - the steam will absorb all the dust from the atmosphere and it won't interfere with your installation.
- 2) Thoroughly clean and degrease the screen surface, then polish it to a shine with a dry cloth.
- 3) Install the cover as evenly as you can - you can position it using the positioning frame from the set.
- 4) Get rid of air bubbles by pressing the entire surface with circular motions for several seconds. Do this so that the adhesive layer bonds with the screen as strongly as possible.

PRODUCT FEATURES:

- 100% original
- Packed in original packaging
- Minimalist design
- Slim shape
- Additional lens protection
- Ability to use the frame as a stand
- Perfectly fitted
- Easy to install and remove
