Product code: 5906302332373

EAN: 5906302332373

Tech-Protect Glass Fit+ tempered glass is a high-quality protective accessory made from lightweight and precisely milled glass with a thickness of only 0.3mm.

The perfectly fitted design fully retains the sensitivity of the touchscreen. The manufacturer rates its hardness level at 9H on a ten-point scale, which translates to exceptional scratch resistance during daily use.

The glass features crystal-clear transparency, preserving the natural colors and sharpness of the display. An additional advantage is the special oleophobic coating, which effectively minimizes the accumulation of fingerprints and other contaminants on the glass surface, making it easier to keep clean.

\* The glass is compatible with most cases available on the market.

\*\* Due to the various milling of display edges, after installing the protective film/glass on the screen, a delicate air halo may appear around the screen! This is a natural situation and depends on the milling of the screen in that particular unit.

### **INSTALLATION INSTRUCTIONS:**

- 1) Start the installation in the bathroom right after a shower - the steam will absorb all the dust from the atmosphere and it won't interfere with your installation.
- 2) Clean and degrease the screen surface thoroughly, then polish it to a shine with a dry cloth.
- 3) Install the coating as evenly as you can - you can position it using two small strips, sticking them to the side of the device.
- 4) Remove air bubbles by firmly pressing the entire surface in circular motions for several seconds. Do this so that the adhesive layer bonds with the screen as strongly as possible.
