TECH-PROTECT KEVLAR CAM+ GALAXY S25 FE BLACK

Product code: 5906302333325

EAN: 5906302333325

Tech-Protect Kevlar Cam+ is an armored series of cases that will protect your device from all angles in any conditions. The case is designed based on an advanced hybrid construction, making it perfectly fitted and lightweight.

The two-part housing combines a hard shell that fits on the back, made of PC coating, and shock-resistant TPU. Additional reinforcement in the corners - protective air cushions - effectively absorb any fall. The front of the device is surrounded by a frame with an integrated polycarbonate shield. This solution effectively separates the display, protecting it from scratches.

Raised edges protect the lens and display of your smartphone from damage, non-slip finish, and the ability to wirelessly charge are additional features that Kevlar Cam+ is equipped with.

An important element worth mentioning is the functional kickstand. The easy-to-use leg serves both as a stand - allowing the phone to be positioned vertically and horizontally - and as a finger grip to securely hold the phone in hand.

Additionally, the case is equipped with a practical camera cover. This protection prevents the risk of scratching and damaging the lens, which is essential for maintaining excellent photo and video quality.

The Kevlar Cam+ case has a military certification MLT-STD-810H, which means that the product has undergone specialized durability tests and meets strict usability requirements.

PRODUCT FEATURES:

- 100% Original
- Packed in original packaging
- Lightweight construction
- Integrated polycarbonate shield protecting the screen
- Foldable kickstand
- Protective camera cover
- Provides extreme protection against falls

- Perfectly fitted
- Precisely made cutouts
- Button covers
- Fully functional
- Meets military drop-test standard (MLT-STD-810H)
- Easy to install and remove

SET INCLUDES:

1 x Tech-Protect Kevlar Cam+ Case
