TECH-PROTECT KEVLAR MAGSAFE IPHONE 17 PRO MAX BLACK

Product code: 5906302331642

EAN: 5906302331642

Tech-Protect Kevlar MagSafe is an armored series of cases that will protect your device from all angles in any conditions. The case is designed based on an advanced hybrid construction, making it perfectly fitted and lightweight.

The two-part casing combines a hard armor that fits on the back, made of PC coating and shock-resistant TPU. Additional reinforcement in the corners - protective air cushions - effectively absorb every fall. The front of the device is surrounded by a frame with an integrated polycarbonate shield. This solution effectively separates the display, protecting it from scratches.

Raised edges protect the lens and display of your smartphone from damage, the anti-slip finish, and the possibility of wireless charging are additional features that Kevlar MagSafe is equipped with.

Compatibility with MagSafe technology makes using the device even easier and more convenient. You can effortlessly charge your phone and use various accessories with Apple technology.

The last element worth mentioning is the functional kickstand. The easy-to-use leg serves both as a stand - allowing you to set the phone vertically and horizontally - and as a finger grip to securely hold the phone in your hand.

The Kevlar case has a military certification MLT-STD-810H, which means that the product has undergone specialized durability tests and meets strict user requirements.

PRODUCT FEATURES:

- 100% Original
