Product code: 5906302352845

EAN: 5906302352845

Description

Tech-Protect Camring Fit+ is a camera protection that combines aluminum and tempered glass, protecting your smartphone's lenses from scratches and impacts. The set includes a mounting frame that precisely guides the installation and ensures perfect positioning of each lens. It is an elegant protection that does not interfere with the camera's operation or affect photo quality.

The aluminum frame surrounds the camera module, creating the first line of defense against impacts and contact with surfaces. The tempered glass covers each lens separately, protecting it from scratches caused by keys, sand, and other sharp objects. The design is precise enough not to affect autofocus, white balance, or the quality of recorded materials. The color scheme perfectly matches most cases and adds a premium character to the phone.

The Camring Fit+ mounting system has been designed with simplicity and certainty of installation in mind. The dedicated frame guides each lens to the right place, eliminating the risk of inaccurate seating. Once installed, the protection remains invisible during everyday use, maintaining full camera functionality. It is comprehensive protection for the photographic module without compromising photo quality.
